## **Realtime Transcription: Wireless & Refreshed** (StenoCast & Bridge 2)

Status update on StenoCast products. (Prices are subject to change.)

### **Writer to Reporter's Computer: The StenoCast Green**

Release expected around June 2011. (Replaces the X1, Edge, and Edge JR)

**Green Base Model: \$300**

Wireless steno only. Replaces the X1.

**Green Plus: \$495**

Wireless steno plus storage of notes.

**Green Pro: \$695**

Wireless steno, storage of notes, plus wireless microphone that sends audio to the Green for storage.

### **Wireless to just One Client - Me2U: \$199**

Looks like a pair of USB EzReceivers.

One plugs into the reporter's computer to transmit.

Another plugs into the client's computer to receive.

### **Reporter's Computer to Client Computers: The RED or the X7**

**X7: \$300**

Can transmit to 7 blue EzReceivers

**RED (Refresh-enabled device): \$400**

Can transmit to 7 blue EzReceivers.

Can also transmit to 7 red EzReceivers.

(Red EzReceivers operate at a higher speed for use with Bridge refresh protocol.)

### **Receiving Devices for Clients**

**EzReceivers (blue or red): \$100 each**

A small USB device pre-matched to your specific transmitter

**Realtime TV (Transcript Viewer): \$400 each**

Release expected in Summer 2011.

A 7" touch screen that's pre-matched to your specific transmitter.

Weighs just half a pound. Turn it on and it's ready to use.

### **Wireless Microphone System - Audio2Me: \$300**

Two microphones. One unit acts as a transmitter (range, approx. 75 ft.)

Second unit acts as a receiver.

Each unit has a lithium battery that runs about 30 hours on a full charge.

Connect via a USB port or a traditional microphone input.
